

I see skies of blue
and I see clouds of white
And the brightness of day
I like the dark
And I Think to myself
what a wonderful world

Jannelli&Volpi. Creiamo meraviglia, dal 1961.

Creating wonder, since 1961.

LE ORIGINI

Jannelli&Volpi designs and produces collections of wallpapers and wallcoverings known and admired worldwide.
It's a place where innovation intertwines with tradition and where industrial production combines creativity, artisanal know-how, and state-of-the-art technological processes.

Founded in 1961 in Milan by Oreste Jannelli, his wife Emilia, and their relatives, it has a history where the value of made in Italy can be read on every page, that of a company deeply rooted in its territory, which has managed to grow, evolve, and establish itself in international markets, standing out for quality and style.

It is Jannelli&Volpi, a family story and an unchanged passion: "capturing wonder and spreading it around the world is what has brought us here, and what the world recognizes in us every day."

WHO WE ARE ALSO INDICATES WHO WE WILL BE

The experience of our company has always been a fundamental value, a "system" that, starting from a common vision, manages to integrate multiple experiences, and therefore also integrate with different partners who share the same vision.

An open and efficient system that has given rise to a team where the most tested experiences are accompanied by young professionals with operational roles, ensuring continuity for the company and a constantly open view of the future.

WHAT DO WE DO

LOVING THE PRODUCT, SPREADING PASSION, HAVING INTUITION.

Every day at our laboratories, ideas take shape and become creative projects, which then transform, in the production and packaging departments, into wallcoverings that change or even create the face of environments, giving them a new breath and infinite new interpretations. We promote and defend the product culture every day, through continuous research, and with processes that start from a strictly artisanal point of view to then become innovation.

PRODUCTION

HIGH TECHNOLOGY WITH LOW ENVIRONMENTAL IMPACT.

Jannelli&Volpi has always invested in the continuous implementation of production techniques, pursuing a corporate strategy that has creativity and innovation as its guidelines.

The achievement of increasingly advanced methodologies, also thanks to the new plant inaugurated in 2014, guarantees us the flexibility necessary to respond to market evolution and increasingly complex and sophisticated demands.

And since innovation also means respect for the environment, we work to minimize the environmental impact of every production process. We do this through the exclusive use of water-based inks, a closed-loop water circuit, energy recovery, the use of certified raw materials from sustainably managed supply chains, and rigorous control of working conditions in the plant.

THE BRANDS: COLLECTIONS OF EXCELLENCE.

MISSONI

"Discovering mutual affinities, is a result of creating a new Collection,"
(Rosita Missoni)

From the meeting between Jannelli&Volpi and Missoni is born Missoni wallcoverings.

An encounter between two apparently distinct worlds, paper and yarn, which, coming together, have revealed a common design. Interwoven plots made of solid family traditions, Italian craftsmanship, passion for one's work.

The result is an extraordinary collection in which material, shapes, and colors skillfully play and dress the walls like a high fashion garment: unique and precious.

JVstore and JVstudio are two concepts, the former aimed at the public and the latter at professionals in Milan, the heart of international design.

Two points of reference for wallpaper but also extraordinarily vital realities for cultural initiatives dedicated to decor, trendy design, and new ideas.

Today it is a source of inspiration and discovery where wallpaper and wallcovering play a role of international excellence, alongside exceptional co-stars such as home fabrics, curtains, furnishing accessories, and design objects.
